

Patent Claims

1. A cloth carpet composed of at least two inseparable layers combined in a popular way, **characterised by the fact** that at least one layer, usually the surface one, is made of a cloth (1) of basis weight between 1100 and 1500 g.s.m. produced of yarn of 100% wool or yarn made of wool with ca. 10% admixture of popular textile fabrics, combined by gluing, sewing, tufting or milling with a second cloth layer (2) or an industrial fabric (3).
2. The carpet according to the claim 1, **characterised by the fact** that fabrics that form fleece cover or design items are placed on the surface, at the surface level or below the surface of the cloth (1).
3. The carpet according to the claim 1, **characterised by the fact** that textile pieces (4) and/or fleece pieces (6) and/or strips (8) and/or flat patches (11) and/or elements (12) and/or flat appliqués (13) and/or convex designs (14) are fixed to the cloth surface (1) by gluing, sewing or milling.
4. The carpet according to the claim 1, **characterised by the fact** that the cloth layer (1) is formed of a milled woollen woven fabric with part of threads of weft (18) and/or warp (16) are made of non-woollen fabrics (17).
5. The carpet according to the claim 1, **characterised by the fact** that the cloth layer (1) made of milled woollen woven fabric is covered with painted

graphic designs (**19**) and combined with a regular cloth layer (**20**) or an industrial fabric layer (**21**) where layers (**1**), (**20**) and (**21**) are tufted, glued, sewn or milled.

6. The carpet according to the claim 1, **characterised by the fact** that, the cloth layer (**1**) has some notches (**22**) which are filled with fleece pieces in the form of fine woollen yarn (**23**) or spun yarn (**23**), woven fabrics (**24**), fabrics manufactured by knotting (**25**) or fabrics manufactured by pressing into a fabric structure (**26**).
